OBJECT STORAGE AND WATSON ASSISTANT IN IBM CLOUD

1. Create a Bucket in IBM object storage.

The screenshot displays the IBM Cloud console interface for managing Cloud Object Storage. The left sidebar shows the navigation menu with 'Buckets' selected. The main content area shows the configuration for a bucket named 'ucencse'. The 'Configuration' tab is active, displaying the 'Bucket configuration' section. Below this, the 'Bucket details' section provides information about the bucket's properties.

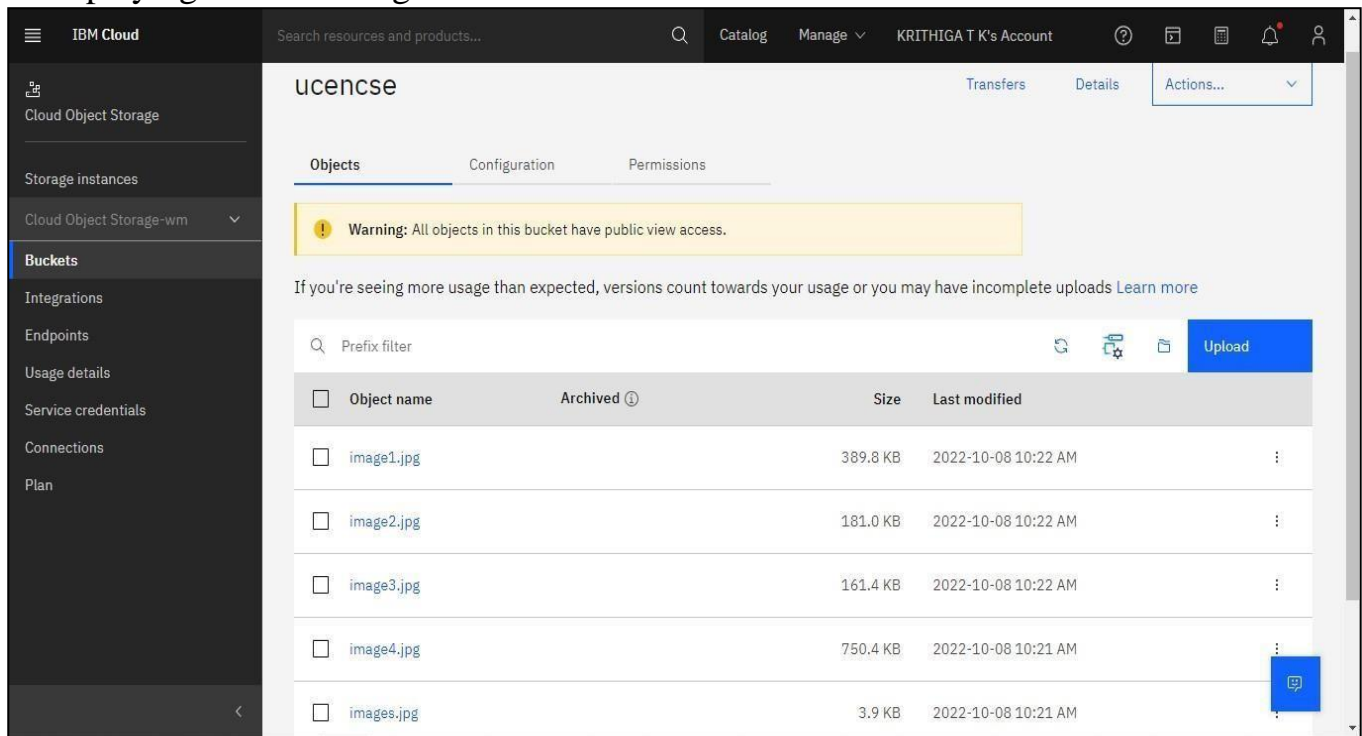

Bucket details	
Bucket name	ucencse
Service instance	cloud-object-storage
Total objects	5
Storage class	Smart Tier ⓘ
Cloud Functions trigger	Disabled Learn more
Total bytes	1.5 MB
Resiliency	Regional

2. Upload 5 images to IBM object storage and make it public. Write html code to displaying all the 5 images.

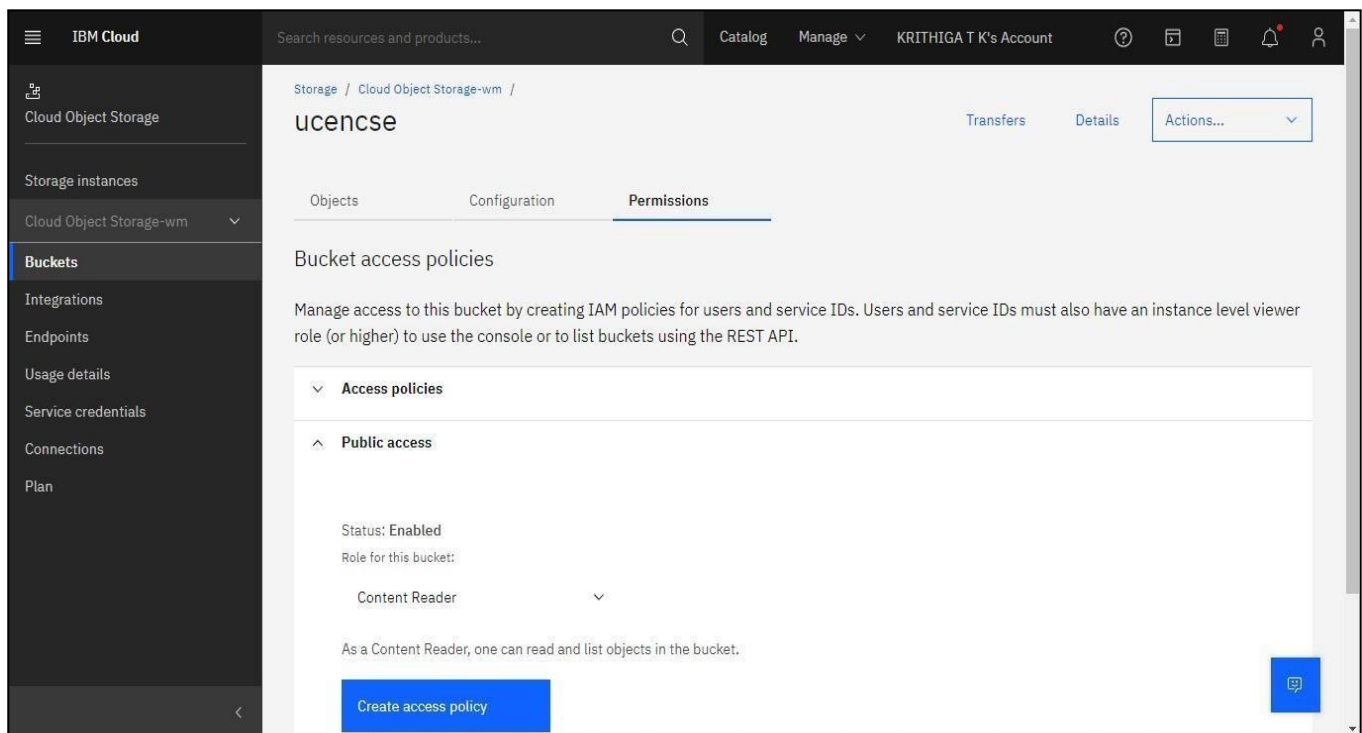

The screenshot shows the IBM Cloud Object Storage console. The left sidebar contains navigation links: IBM Cloud, Cloud Object Storage, Storage instances, Cloud Object Storage-wm, Buckets, Integrations, Endpoints, Usage details, Service credentials, Connections, and Plan. The main panel displays the 'ucencse' bucket. At the top, there are tabs for 'Objects', 'Configuration', and 'Permissions'. A yellow warning banner states: 'Warning: All objects in this bucket have public view access.' Below this, a message says: 'If you're seeing more usage than expected, versions count towards your usage or you may have incomplete uploads. Learn more'. A table lists the objects in the bucket:

Object name	Archived	Size	Last modified
image1.jpg		389.8 KB	2022-10-08 10:22 AM
image2.jpg		181.0 KB	2022-10-08 10:22 AM
image3.jpg		161.4 KB	2022-10-08 10:22 AM
image4.jpg		750.4 KB	2022-10-08 10:21 AM
images.jpg		3.9 KB	2022-10-08 10:21 AM

An 'Upload' button is visible in the top right corner of the object list area.

5 images was uploaded in the cloud object storage

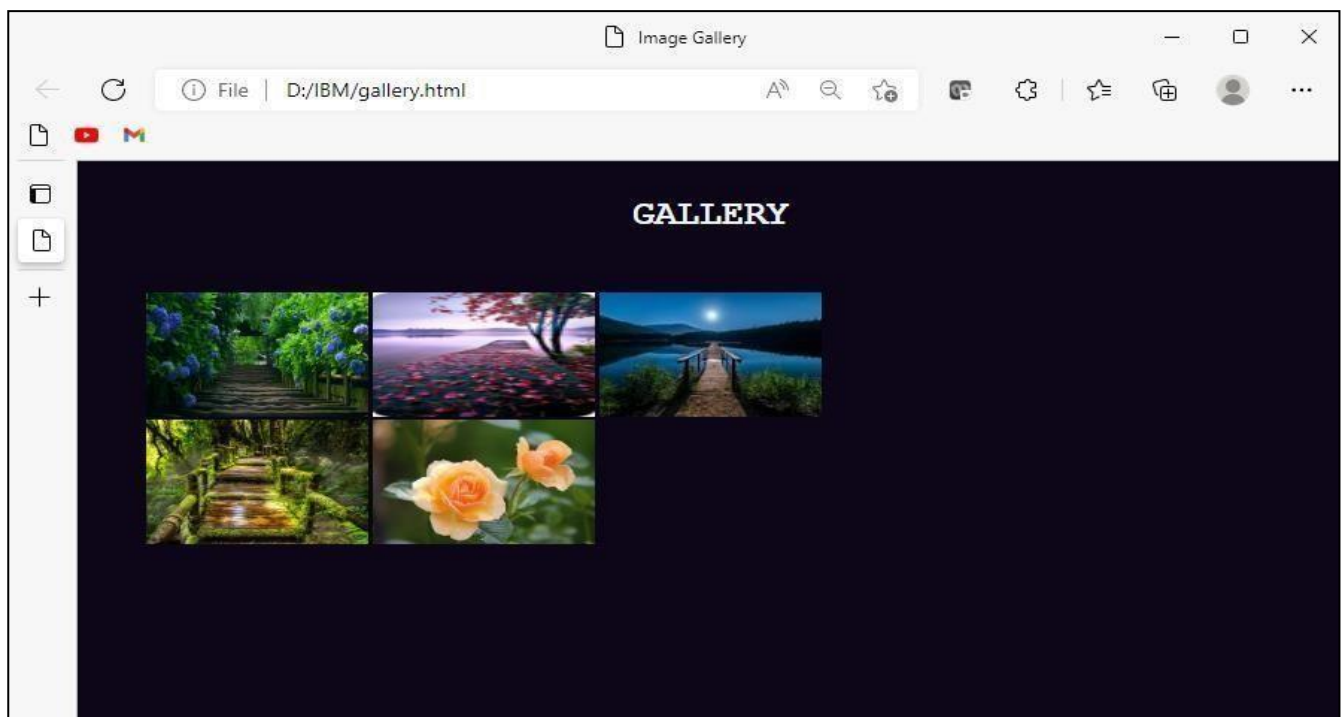

The screenshot shows the IBM Cloud Object Storage console, specifically the 'Permissions' tab for the 'ucencse' bucket. The left sidebar is the same as in the previous screenshot. The main panel shows the 'Permissions' tab. Below the bucket name, there is a section titled 'Bucket access policies'. It contains the following text: 'Manage access to this bucket by creating IAM policies for users and service IDs. Users and service IDs must also have an instance level viewer role (or higher) to use the console or to list buckets using the REST API.' Below this text, there is a section titled 'Access policies'. Under 'Access policies', there is a section titled 'Public access'. It shows 'Status: Enabled' and 'Role for this bucket: Content Reader'. Below this, it says: 'As a Content Reader, one can read and list objects in the bucket.' At the bottom of the 'Public access' section, there is a blue button labeled 'Create access policy'.

Public access is enabled

Output

4. Design a chat bot using IBM Watson assistant for a hospital. Example the user comes with a query to know the branches of that hospital in your city. Submit the web URL of that chat bot as an assignment.
